Summary

Since starting out in the tech industry in 2016, I've pursued an education in Cybersecurity & Digital Forensics while working in IT support in business environments. Having recently graduated an accelerated Full Stack Web Development program through the University of Washington, I've been able to find the ability to combine my passion for art/design and my background in technology — I'm driven to continue expanding my knowledge and ideas through the field of development.

Education

Full Stack Web Development
2021 | University of Washington

Information Security
2020 | Edmonds College

Cybersecurity Forensic Analyst
2017 | Cybersecurity Institute

Skills

MERN Stack	Dev	Tools
MongoDB	APIs	VS Code
Express.js	Javascript	Workbench
React.js	Express.js	Insomnia
Node.js	Handlebars.js	Robo3T
	MySQL	Postman
	Git	Heroku

Projects

Donut Shop
- MERN stack application, using Materialize CSS framework for design and Apollo server.
- This project is a shop front for a local donut shop, allowing users to create an account, add donuts to their cart and checkout with Stripe.

NoteSafe
- MERN stack application, with React-Bootstrap design and Redux, utilizing security features such as password hashing and web tokens.
- This project allows users to create a profile, where they can then login to view, edit, and delete their notes.

Tech Blog
- Full stack application utilizing MySQL, Handlebars.js, Node.js, Express.js, and Bootstrap for layout.
- This project is a blog site for users to create an account, post blogs, and comment on blogs.

Covid Country Data
- Front end application implementing a 3rd party API to pull covid statistics based on country.

Experience

Digital Forensics Lab Manager
Edmonds College | Sep 2017 - Present

Assist students & teachers in the Digital Forensics lab at the college, answering questions and assisting in lab setup/ implementation

Technical Specialist
Remote AppleCare Advisor
Apple | Nov 2019 – Jan 2021

Used a variety of tools and troubleshooting methods to assist customers in finding solutions for their Apple products, services, and related systems

IT Support Specialist
Blueprint Technologies
Dec 2017 – July 2019

Worked in a small IT team to support, build, and improve the IT infrastructure, systems, and client relationships in an expanding small business environment throughout locations across the country
